

GRIMALDI GROUP

The Grimaldi Group is deeply committed to the concept of sustainable and environmental friendly mobility through the development of logistic solutions based on energy efficiency and GHG reduction principles. It is hereby stated that:

Customer Name	Reference year
SMET SA	2016

by choosing, in 2016, the Motorways of the Sea of Grimaldi Group as intermodal transport solution instead of the road option, has contributed to reduce the CO₂e emissions in the atmosphere of:

19710 ton CO₂e

The CO₂e emission reduction are evaluated in accordance with the “Rina rules for the validation of CO₂e index calculation”.

Issued in Sardinia

On: 29 September 2017

This figure of CO₂e, emissions reduction obtained choosing motorways of the sea of Grimaldi Group instead of road modality, has been evaluated using environmental indexes, defined as grCO₂e/km, of 27 ships owned and operated by Grimaldi Group, these indexes are verified by Rina service spa through “Rina rules for the validation of CO₂e index evaluation” with in-office and on-board specific audits to check data declared.

The comparisons of CO₂w emissions has been done evaluating the CO₂ emitted to transport one trailer using one of 27 ships of motorways of the sea of Grimaldi Group against the CO₂e emitted by one lorry Euro IV with trailer considering same departure and arrival points.
